Summary:

As a rather professional full-stack web developer, I have full expertise in both front-end and re-give-up technologies. My skills include HTML, CSS, JavaScript, React.Js, Node.Js, Express.Js, MongoDB, and Next.Js. With a strong foundation in building responsive and dynamic .NET packages, I excel at reworking complex requirements into modern, consumer-friendly solutions. I am dedicated to writing clean, green code and have a keen eye for detail, ensuring high-quality overall performance and a seamless consumer experience. I am a dynamic development team and eager to contribute my capabilities to advance strong impactful work.

Technical Skills:

- **Front-End Development:** HTML5, CSS3, Tailwind CSS, Bootstrap, JavaScript (ES6+), React.js, Framer Motion

Back-End Development:

- **Node.js:** Asynchronous programming, event-driven architecture
- **Express.js:** RESTful API development, middleware integration
- **MongoDB:** NoSQL database design, CRUD operations, Mongoose ORM
- **JWT (JSON Web Tokens):** Authentication and authorization

Experience:

- **Developed and maintained** full-stack web applications using React.js, Node.js, Express.js, and MongoDB.
- **Implemented server-side rendering and static site generation** using Next.js to improve SEO and performance.
- **Designed and developed RESTful APIs** for efficient data exchange between the front-end and back-end systems.
- **Created dynamic, responsive user interfaces** with React.js, ensuring cross-browser compatibility and a seamless user experience.
- **Integrated authentication and authorization** using JSON Web Tokens (JWT) for secure user access and data protection.
- **Optimized application performance** through code splitting, lazy loading, and implementing caching strategies.
- **Utilized version control** with Git and GitHub for source code management, including branching, merging, and pull requests.
- **Conducted code reviews** and provided mentorship to junior developers to ensure code quality and adherence to best practices.
- **Deployed applications** to production environments using CI/CD pipelines, ensuring seamless updates and minimal downtime.
